Outcome

1. Students will learn fundamentals of adverse drug reactions (ADRs) and the significance of safety reports in identifying and monitoring these reactions.
2. Students gained knowledge of the many techniques used to gather, examine, and assess information about ADRs. Additionally, the course covers concepts of signal detection and risk management techniques.
3. The MedDRA coding course provide Students with a comprehensive understanding of Pharmacovigilance principles, ADR reporting, and the role of MedDRA in coding and analyzing adverse events.
4. The course equipped Students with the necessary skills to effectively contribute to drug safety and ensure accurate and standardized reporting of ADRs.

Summary Report

Type of Program	**Certificate course on MedDRA coding**
Period	23rdNovember 2022 – 29thNovember 2022 (36 hrs)
Brief Report	A certificate course in MedDRA coding was conducted at the institute in Collaboration with Elite institute of Pharma skills, Pune. The course was held between 23rdNovember 2022 – 29thNovember 2022 (36 hrs). The course covered varied topics like in Module I participants were introduced to the field of Pharmacovigilance and its importance, and the module covered the fundamentals of adverse drug reactions (ADRs) and the significance of safety reports. Module II focused on the methodologies employed in Pharmacovigilance. Module III explored the basics of the Medical Dictionary for Regulatory Activities (MedDRA). Module IV focused on data analysis and query building techniques in Pharmacovigilance. Module V The final module of the course involved an industry-based case study, where participants applied their acquired knowledge and skills in a real-world scenario.57 students at the institute enrolled for this course. The chief course conductors were Elite institute of Pharma skills. Overall, the MedDRA coding course provided participants with a comprehensive understanding of Pharmacovigilance principles, ADR reporting, and the role of MedDRA in coding and analysing adverse events. The course equipped participants with the necessary skills to effectively contribute to drug safety and ensure accurate and standardized reporting of ADRs. The course was Coordinated by Mrs. R. A. Jinturkar Assistant Professor Department of Pharmaceutical Chemistry and well supported by the administrative and non –teaching staff.

Name of Course: Certificate Course on SAS Programming **Date: 19/12/22 - 24/12/22**
Course Code: NA **Course Duration: 33 hrs**

Syllabus

Module I
Overview, Downloadable course materials
Access free SAS software "SAS on Demand for Academics/cloud-based SAS studio"
How to use SAS on Demand for academics/cloud-based SAS studio with this course
Downloadable Power Point Slides in PDF form and SAS programs for all lectures
SAS introduction

Module II
Get Data into SAS: Create Temporary and Permanent SAS data
Read data delimited by commas (.csv data file) using list input
Read data delimited by any delimiters using list input
Read data in fixed columns using column input
Read data using formatted input including using SAS in format to read dates
Read data using formatted input: use SAS format to display SAS date values
Create internal SAS data using DATALINES statement
LIBNAME statement: assign library names and create permanent SAS data sets
Proc Import: Import Excel data file into SAS
Proc Import: Import external delimited data files into SAS
Coding Exercise
Coding Exercise: Solution

Module III
SAS functions: overview
Conditionally execute SAS statements: IF-THEN/ELSE, DO and END statements
Conditionally execute SAS statements: IF-THEN/ELSE, DO and END statement (Cont.)
Define the length of a variable using the LENGTH statement
Subset your Data using subsetting IF statement and DELETE statement

Module IV
Create and Label Formats
Use FORMAT statement to assign Formats to Variable: more on SAS Built-in Formats
Create your user defined FORMATS
Storing and Referencing/using your User-Defined FORMATS
Proc format with CNTLIN= option to define custom formats

Module V
SCAN function: Separate a character value and obtain a specified word/string
SUBSTR function: Extract and replace a portion of a character value
TRIM and CATX functions: Concatenate character values
INDEX function: Search a character value for a specified string
FIND function: search for substrings of characters in a character string
UPCASE, LOWCASE and PROPCASE functions: Change the case of characters
TRANWRD function: Replace/remove characters within a character string
SAS numeric functions: INT and ROUND functions: Modifying Numeric Values
Additional SAS numeric functions: Smallest and Largest functions
Additional SAS numeric functions: RAND function

Module VI
Use SAS functions to manipulate sas date values
EAR, QTR, MONTH, DAY, WEEKDAY Functions: Extract year/quarter/month/day values
TODAY, DATE, INTCK functions: get current date value & number of time interval
DATDIF, YRDIF function: Calculate difference in days and years between two dates

Constructing DO loops: part 2
Conditionally Executing DO Loops using DO UNTIL and DO WHILE
Using Conditional Clauses with the Iterative DO Statement

Module VIII
Using arrays to simply coding
Creating Variables in an ARRAY Statement
Assigning Initial Values to Arrays & Creating Temporary Array Elements
Two dimensional array
Module IX
Combine SAS data sets
Concatenating
Appending
Interleaving
Match merging
Types of match-merging: merge data sets one-to-one and one-to-many
Match Merging: Renaming Variables
Match Merging: Excluding Unmatched Observations
Match Merging: Selecting Variables

Name of Course: Certificate Course on SAS Programming
Date: 19/12/22 - 24/12/22
Course Code: NA **Course Duration: 33 hrs**

Outcome

1. The course provides a comprehensive introduction to SAS programming, covering essential topics such as data import, conditional execution, data manipulation, date manipulation, loops, arrays, and data set merging.
2. Students gain practical skills and knowledge to effectively use SAS for data analysis and manipulation tasks.
3. Students learn how to use SAS functions to manipulate SAS date values.
4. Students learn about arrays as a way to make coding simpler. They learn how to work with two-dimensional arrays, generate temporary array elements, assign initial values to arrays, and create variables in an ARRAY command..
5. Students are introduced to arrays as a means to simplify coding.

INTRODUCTION TO RESEARCH

PROF. EDAMANA PRASAD
Department of Chemistry
IIT Madras

PROF. PRATHAP HARIDOSS
Department of Metallurgical and Materials Engineering
IIT Madras

PRE-REQUISITES : Students who have completed undergraduate studies (in Engineering or Science) will be in a better position to benefit from this course

INTENDED AUDIENCE : Students of ME/MTech/MS/MSc/PhD can benefit.

COURSE OUTLINE :
Large numbers of students are actively considering and taking up research and associated higher studies. This course aims to introduce students to the important aspects of research. The intent of the course is to make students aware of the details associated with formal research and to help students overcome common misconceptions that may be present in their minds. By going through this course, students are likely to be able to take up research activities in a more systematic and formal manner right from the beginning.

ABOUT INSTRUCTOR :
Prof. Edamana Prasad, Head, Teaching Learning Centre (TLC) and Associate Professor, Department of Chemistry, E. PRASAD, Professor, Department of Chemistry, Indian Institute of Technology Madras. Educational Qualification: BSc., & MSc. From Calicut University, Kerala, India during 1990-1995; Ph.D. from NIIST, Thiruvananthapuram, Kerala, India in Photophysical Chemistry in 2000.Post Doctoral Research Experience:(2001 to 2006) Texas Tech University & Lehigh University, USA and University of Bonn, Germany (Alexander von Humboldt Fellow)

Prof. Prathap Haridoss is a Professor in the Department of Metallurgical and Materials Engineering at IIT Madras. He works in the areas of Fuel Cell and Carbon nanomaterials. He has a B.Tech in Metallurgical Engineering from IIT Madras, and a PhD in Materials Science and Engineering from the University of Wisconsin-Madison, USA. Before he joined as a faculty at IIT Madras, he served as a Senior Scientist at Plug Power, a Fuel Cell company in New York. He has 3 US patents, several International Journal publications, and has published a book titled "Physics of Materials, Essential Concepts of Solid State Physics"

COURSE PLAN :

Week 1 : A group discussion on what is research; Overview of research;

Week 2 : Literature survey , Experimental skills;

Week 3 : Data analysis, Modelling skills;

Week 4 : Technical writing; Technical Presentations; Creativity in Research

Week 5 : Creativity in Research; Group discussion on Ethics in Research

Week 6 : Design of Experiments

Week 7 : Intellectual Property

Week 8 : Department specific research discussions

National Programme on Technology Enhanced Learning (NPTEL)

The National Programme on Technology Enhanced Learning (NPTEL) was initiated by seven Indian Institutes of Technology (Bombay, Delhi, Kanpur, Kharagpur, Madras, Guwahati and Roorkee) along with the Indian Institute of Science, Bangalore in 2003.

The Online Education which was started with NPTEL for Technology Courses has now been broadened to include all other disciplines such as Humanities, Social Sciences and Management in the indigenous online platform SWAYAM.

NPTEL has becomes a part of SWAYAM, all the NPTEL Local Chapters have been re-designated as **SWAYAM - NPTEL Local Chapter.**

Anytime Anywhere Learning

Massive Open Online Courses (MOOC) is essentially an asynchronous platform and a process for teaching through pre-recorded lectures, resource video materials, lecture notes, assignments and quizzes, which are usually online and provide self-assessment in regular intervals during learning.

The enrolment to and learning from these courses involves no cost.
Following these online courses, an in-person, proctored certification exam is conducted across 100+ cities within India and a certificate is provided through the participating institutions and industry, when applicable.

As it is MOOC type of course conducted by Government body open to all and attended by enrolled candidate from any where and anytime.

Brochure IPR and Competition Law

INTELLECTUAL PROPERTY RIGHTS AND COMPETITION LAW

Prof . K. D. RAJU
Prof. NIHARIKA SAHOO BHATTACHARYA
IIT Kharagpur

INTENDED AUDIENCE : Students from Law, Management and business studies and Technical background can benefit from the program

COURSE OUTLINE :

Competition Law and Intellectual Property Law prima facie appear to have conflicting objectives and goals. While Competition law operates towards facilitating the market growth by curbing anti-competitive practices in the market, IPRs confer exclusive monopoly to the proprietor. However, both are intended towards promoting innovation and consumer welfare. In the ever evolving technology driven society, the recent conflict between the domain of IPRs and completion law pertains to the exercise of rights in IPR affecting competition law. Therefore, in the light of the above intricacies and problems the course aims to discuss the general principles and laws related to Intellectual Property Right and Competition law, The course also provides an overview of the application and operation of both the laws in different jurisdictions and tries to simplify the overlapping domain of IP and Competition Law.

ABOUT INSTRUCTOR :

Prof. Raju K.D is presently Professor at Rajiv Gandhi School of Intellectual Property Law, Indian Institute of Technology, Kharagpur. His research career began with M.Phil studies at Jawaharlal Nehru University, New Delhi on International Law and further his doctoral studies at JNU.He has been awarded "Fulbright Scholarship by the United States Education Foundation in India (USEFI) for completing his doctoral studies at the University of Illinois, Urbana Champagne, United States. He has been awarded with the Microsoft Outstanding Young Faculty Award in 2011.

Prof. Niharika Sahoo Bhattacharya is currently working as an Assistant Professor in Rajiv Gandhi School of Intellectual Property Law, IIT Kharagpur. She has done her doctoral studies in the interdisciplinary area of IPR and biomedicines from IIT Kharagpur. Her broad research interest is to analyze and understand the complexities between scientific innovations, their protection and commercialization. Her other research interest are IP issues in pharmaceutics, IP and competition law, and Plant variety Protection.She is actively involved in the research and teaching of various IP subjects and published in many peer reviewed international journals of repute.

National Programme on Technology Enhanced Learning (NPTEL)

The National Programme on Technology Enhanced Learning (NPTEL) was initiated by seven Indian Institutes of Technology (Bombay, Delhi, Kanpur, Kharagpur, Madras, Guwahati and Roorkee) along with the Indian Institute of Science, Bangalore in 2003.

The Online Education which was started with NPTEL for Technology Courses has now been broadened to include all other disciplines such as Humanities, Social Sciences and Management in the indigenous online platform SWAYAM.

NPTEL has becomes a part of SWAYAM, all the NPTEL Local Chapters have been re-designated as **SWAYAM - NPTEL Local Chapter.**

Anytime Anywhere Learning

Massive Open Online Courses (MOOC) is essentially an asynchronous platform and a process for teaching through pre-recorded lectures, resource video materials, lecture notes, assignments and quizzes, which are usually online and provide self-assessment in regular intervals during learning.

The enrolment to and learning from these courses involves no cost.
Following these online courses, an in-person, proctored certification exam is conducted across 100+ cities within India and a certificate is provided through the participating institutions and industry, when applicable.

As it is MOOC type of course conducted by Government body open to all and attended by enrolled candidate from any where and anytime.

Summary

Summary Report

On 29th August 2022, behalf of PES's Modern College of Pharmacy, Nigdi we started new initiative named as **"PGM GPAT Coaching Class"** for Second Year, Third Year & Final Year B. Pharm Students. GPAT is a competitive exam needed for entry in M. Pharm which will provide finanacial assistance to students.

Mentors at PGM GPAT Class are well acquainted with the pattern & subject knowledge of the GPAT exam. They have also explained the topics which have not only the importance in the exam but also carry significant role in day-to-day life. They have cleared the doubts of the students at the end of every lecture. Regular monitoring & attendance of students has been followed for every lecture. At the end of every subject topic we have conducted test to get an idea about understanding of topic from student's perspective.

Also mentors dealt the strategy with students for easy solvation of questions & time management in GPAT exam. Tricks & pnemonics have been circulated along with notes for last minute revision to get ready for the exam. There were total 124 lectures conducted during duration from 29th August 2022 to 19th May 2023 across subjects like Pharmaceutics, Chemistry, Pharmacology, Pharmacognosy & other subjects. Total 8 students attended the regular class & GPAT 2023 Exam.

LEAN SIX SIGMA GREEN BELT For QBD

Pharmaceutical Quality Assurance Department of PES's Modern College of Pharmacy, Nigdi, India in association with Mr.Santosh D. Awasarkar, Lean Six Sigma MBB, CEO-Founder @ Breath Apex IFP, India, under Center For Pharma Business Excellence (CPBE) introduces-CSSC, USA Accredited

LEAN SIX SIGMA GREEN BELT For QBD

Lean Six Sigma For Quality by Design (QBD) principles have been adopted by the USFDA forthe discovery, development, and manufacture of drugs. Infact, global regulatory bodies- USFDA, EMEA made it mandatory for drug manufacturers to implement QBD Compliances into their new drug applications. ICH Guidelines-Q8, Q9, Q10 emphasizes QBD implementations. QBD principles in regulatory submissions ensures less hassle during review, fewer deficiencies leading to quicker approvals, fewer manufacturing problems, reduced number of post-market manufacturing supplements QBD enhances ability to implement new technology that improves manufacturing without regulatory scrutiny. Set of expertise of Lean Six Sigma (DFSS-DMADV, DOE, SPC in QbD will create a synergy to deploy a structured statistical approach in designing & developing quality product.Hence, every global &IndianPharma/ Biotech company need experts who can advise & deploy these high in demand skillsets.PES's Modern College of Pharmacy, Nigdi, India in association with Mr.Santosh D. Curriculum and Outcome

Program Salient Features:

a.) USA accredited Training &Certification Program with Breath Apex IFP's Copyrighted DOE & Statistical Analytics Tools based Physical Simulated Project(LearnBy Actually Doing It!)
b.)Online / Classroom Training for 6 Weekends (1.5 Hrs / Sat & Sun) + 3 Capstone/ Practice Projects, For 30 Hrs. Equivalent to 2 Credit Hrs.
c.) Program Fees (For Corporates / Businesses): Rs. 15000 /- ;
d.) Under "Skill For All" Initiative For Students @ Donation Of: Rs. 1000/-(In India); Rs.5500 / USD 75 (For Rest Of World).
e.) Eligibility : 3rd / Final Yr B. Pharm, 1st /2nd Yr. M. Pharm, BSc /MSc (Biotech / Chemistry / Micro Biology), BE,ME (Chem/Prod/Ind.Engg.), BBA/MBA- Pharma/Biotech.

Program Course Modules:

Module 1. What is QBD, Principles of ICH Q8 CR2), (ICH Q9), (ICH Q10)

Module 2. Definition of QTPP, CQAs, CPPs, CMAs.

Module 3. Importance & History of Quality by Design (QbD) & Lean Six Sigma.
Module 4. DMADV (Define, Measure, Analyze, Design, Verify) vs. DMAIC (Design, Measure, Analyze, Implement & Control);

Module 5. Determining Critical Quality Attributes (CQAs) based on Product Quality, Patient Safety & Efficacy.

Module 6. VOC Drill down, Critical-to- quality or Critical-to- safety, Critical-to- efficacy, Critical-to- delivery, Critical-to- cost), VOP, SIPOC, High Level Process Mapping & Fishbone Diagram.

Module 7. Risk Analysis With Failure Modes Effects Analysis (FMEA) & Pareto Analysis, Process Lever DiagnosticsDesign.

Module 8. Project Charter, Problem Statement & Goal Statement, Project Scoping, Est. Project Benefit / Project QNS, Developing Performance Standard Documents. Project Communication: RACI Model (Responsible, Accountable, Consulted & Informed)

Module 9. FMEA, CI Matrix Driven Prioritization Of Critical Material Attributes (CMAs) & Critical Process Parameters (CPPs) With respect to CQAs.

Module 10. Principles, History & Types of DOE Designs, Full Factorial Design, Randomization, Replication, Repetition.

Module 11. Develop DoE Design Space, Deployment & Measurement of Responses(s), Development of regression model to Verify Design Space.

Module 12. Hypothesis testing, p value, Alpha value, Regression Coefficient, R Square Analysis, DOE Descriptive analysis: Pareto Plot, Main Effect Plot, Interaction Effect Plot & Cube Plots. Statistical Inferential Analysis: Analysis of Model Variance.

Module 13. CMAs / CPPs Optimization With Respect To CQAs.

Module 14. Process Improvement Statistical Validation With 2 Proportion Test.

Module 15. Determination Of Process Capability: Measurement Of Process Performance I ndices- DPMO, DPU, DPO, SIGMA (LT & ST). Prediction Of Process Capability.

Module 16. Process Design Scale Up & Development Of Control Plan:- Monitoring Plan & Response Plan For CMAs, CPPs, & CQAs.

Module17. Statistical Process Control: - Control Charts, Combined Control Charts, Selection & Application Of Attribute Control Charts: Control Charts (p chart, nP chart)

Module 18. Process Control Validation & Determination of Process Capability.

Summary

LEAN SIX SIGMA GREEN BELT For QBD.

Department of Pharmaceutical Quality Assurance of PES's Modern College of Pharmacy, Nigdi, India in association with Mr. Santosh D. Awasarkar, Lean Six Sigma MBB, CEO-Founder @ Breath Apex IFP, India, under Centre For Pharma Business Excellence (CPBE) -CSSC, USA Accredited had conducted value addition certificate course of LEAN SIX SIGMA GREEN BELT For QBD.

Lean Six Sigma For Quality by Design (QBD) principles have been adopted by the USFDA for the discovery, development, and manufacture of drugs. Infact, global regulatory bodies- USFDA, EMEA made it mandatory for drug manufacturers to implement QBD Compliances into their new drug applications. ICH Guidelines-Q8, Q9, Q10 emphasizes QBD implementations. QBD principles in regulatory submissions ensures less hassle during review, fewer deficiencies leading to quicker approvals, fewer manufacturing problems, reduced number of post-market manufacturing supplements. QBD enhances ability to implement new technology that improves manufacturing without regulatory scrutiny. Set of expertise of Lean Six Sigma (DFSS-DMADV, DOE, SPC in QbD will create a synergy to deploy a structured statistical approach in designing & developing quality product. Hence, every global &Indian Pharma/ Biotech company need experts who can advise & deploy these high in demand skillsets.

The course was designed for Final Year B. Pharmacy and M.Pharm First year & Second Year. It was conducted in two batches. The first batch was conducted on following dates 11/02/2023, 12/2/2023, 18/02/2023, 19/02/2023, 11/03/2023. The second batch was conducted on 16/03/2023, 17/03/2023, 18/03/2023, 19/03/2023, 1/04/2023, 02/04/2023, 08/04/2023. During this course following 18 modules were conducted. Total 190 Students successfully completed the course

- What is QBD
- Principles of ICH Q8 CR2), (ICH Q9), (ICH Q10)
- Definition of QTPP, CQAs, CPPs, CMAs.
- Importance & History of Quality by Design (QbD)
- Lean Six Sigma. DMADV (Define, Measure, Analyze, Design, Verify) vs. DMAIC (Design, Measure, Analyze, Implement & Control);
- Determining Critical Quality Attributes (CQAs) based on Product Quality, Patient Safety & Efficacy. VOC Drill down, Critical-to- quality or Critical-to- safety, Critical-to-efficacy,

- High Level Process Mapping & Fishbone Diagram.Risk Analysis With Failure Modes Effects Analysis (FMEA) & Pareto Analysis,
- Process Lever Diagnostics Design.Project Charter, Problem Statement & Goal Statement, Project Scoping, Est. Project Benefit / Project QNS, Developing Performance Standard Documents.
- Project Communication: RACI Model (Responsible, Accountable, Consulted & Informed) FMEA, CI Matrix Driven Prioritization Of Critical Material Attributes (CMAs) & Critical Process Parameters (CPPs) With respect to CQAs.Principles,
- History & Types of DOE Designs, Full Factorial Design, Randomization, Replication, Repetition. Develop DoE Design Space, Deployment & Measurement of Responses(s),
- Development of regression model to Verify Design Space. Hypothesis testing, p value, Alpha value, Regression Coefficient, R Square Analysis, DOE Descriptive analysis: Pareto Plot, Main Effect Plot,
- Interaction Effect Plot & Cube Plots. Statistical Inferential Analysis: Analysis of Model Variance. CMAs / CPPs Optimization With Respect To CQAs. Process Improvement Statistical Validation With 2 Proportion Test.
- Determination Of Process Capability: Measurement Of Process Performance Indices-DPMO, DPU, DPO, SIGMA (LT & ST).
- Prediction Of Process Capability. Process Design Scale Up & Development Of Control Plan:- Monitoring Plan & Response Plan For CMAs, CPPs, & CQAs.
- Statistical Process Control: - Control Charts, Combined Control Charts, Selection & Application Of Attribute Control Charts: Control Charts (p chart, nP chart) . Process Control Validation & Determination of Process Capability.

During the conduct of course Mr.Santosh Awsarkar explained the various topics in detail. The course is very useful for Pharmacy professional. The students were very much engaged during this course. The final examination was conducted on 26/05/2023 at college. The college has taken feedback from each student about the course. The feedback was excellent about overall conduct of course. Every student who passed the examination was awarded with a certificate.

Batch I Day 1:

- Module: What is QBD,Principles of ICH Q8 CR2). (ICH Q9). (ICH Q10) ,Definition of QTPP, CQAs, CPPs, CMAs. ,Importance & History of Quality by Design (QbD),Lean Six Sigma. DMADV (Define, Measure, Analyze, Design, Verify) vs. DMAIC (Design, Measure, Analyze, Implement & Control);

Mr. Santosh Awsarkar at the introductory session explaining important modules

Batch I Day 2

- Module Determining Critical Quality Attributes (CQAs) based on Product Quality, Patient Safety & Efficacy.. VOC Drill down, Critical-to- quality or Critical-to- safety, Critical-to- efficacy, Critical-to- delivery, Critical-to- cost), VOP, SIPOC, High Level Process Mapping & Fishbone Diagram.Risk Analysis With Failure Modes Effects Analysis (FMEA) & Pareto Analysis, Process Lever Diagnostics Design.Project Charter, Problem Statement & Goal Statement, Project Scoping, Est. Project Benefit / Project QNS, Developing Performance Standard Documents

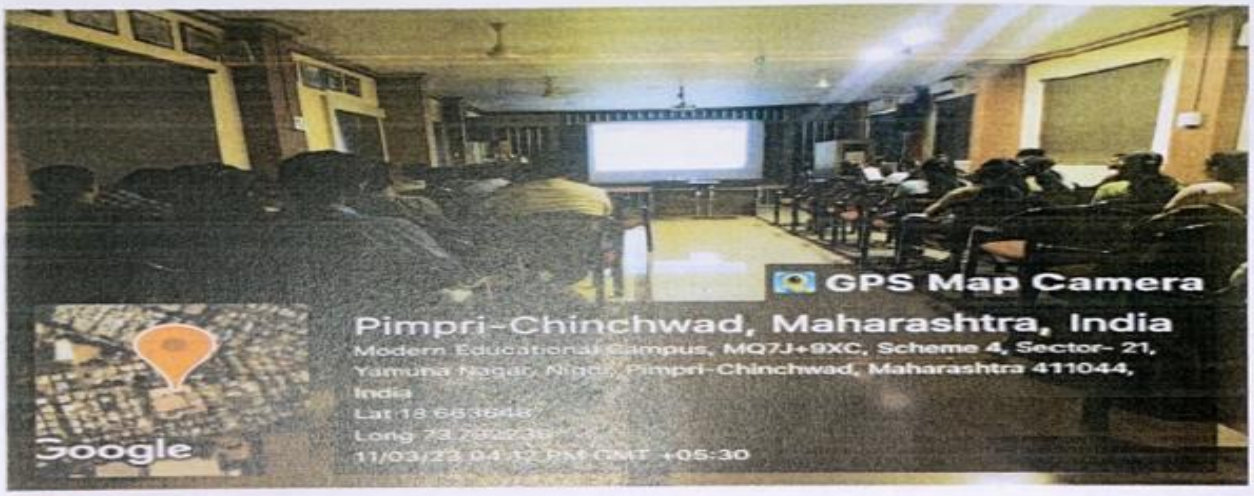
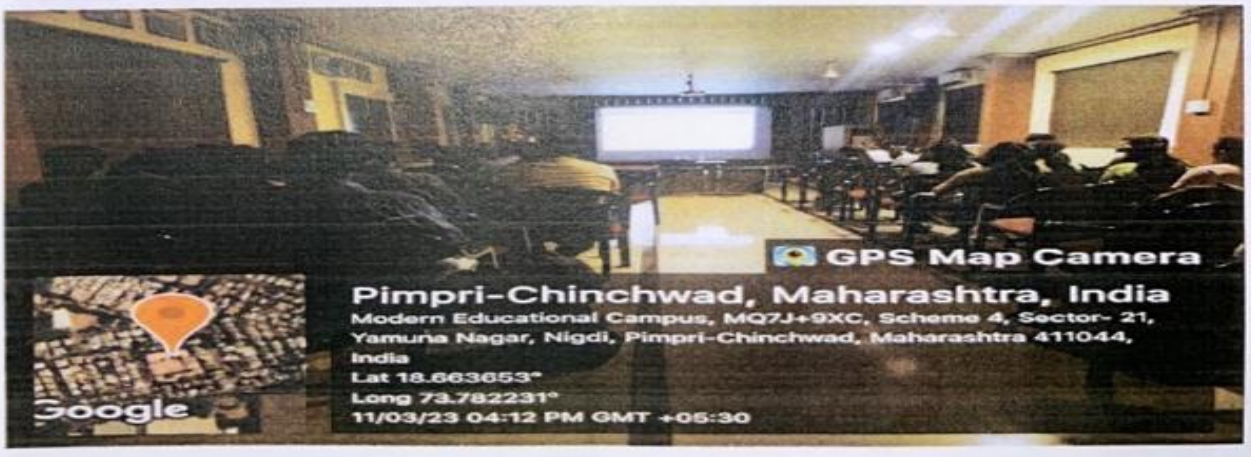
Batch I Day 5

Module: Determination Of Process Capability: Measurement Of Process Performance Indices- DPMO, DPU, DPO, SIGMA (LT & ST)., Prediction Of Process Capability. Process Design Scale Up & Development Of Control Plan:- Monitoring Plan & Response Plan For CMAs, CPPs, & CQAs. Statistical Process Control: - Control Charts, Combined Control Charts, Selection & Application Of Attribute Control Charts: Control Charts (p chart, nP chart). Process Control Validation & Determination of Process Capability

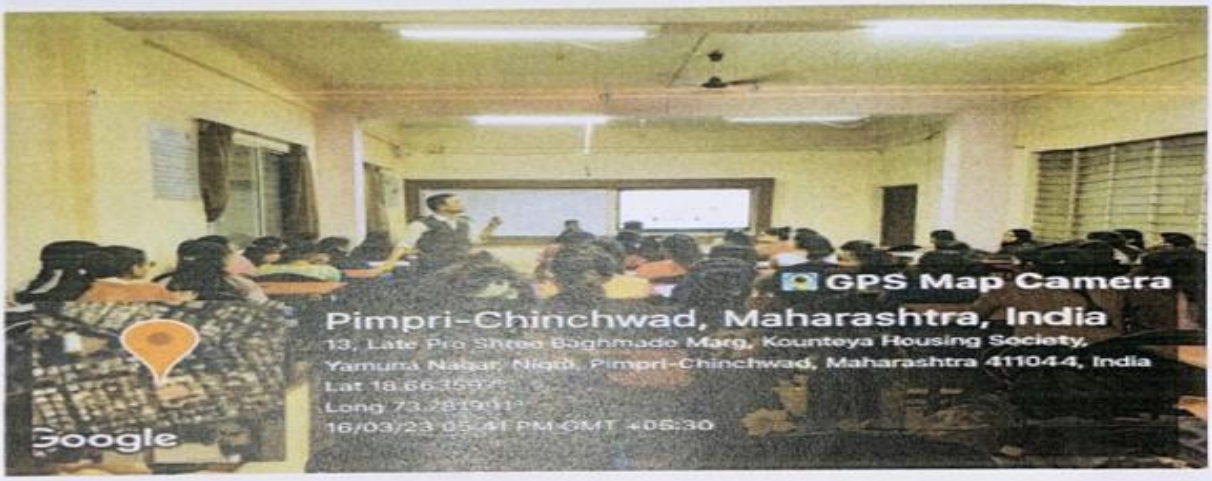


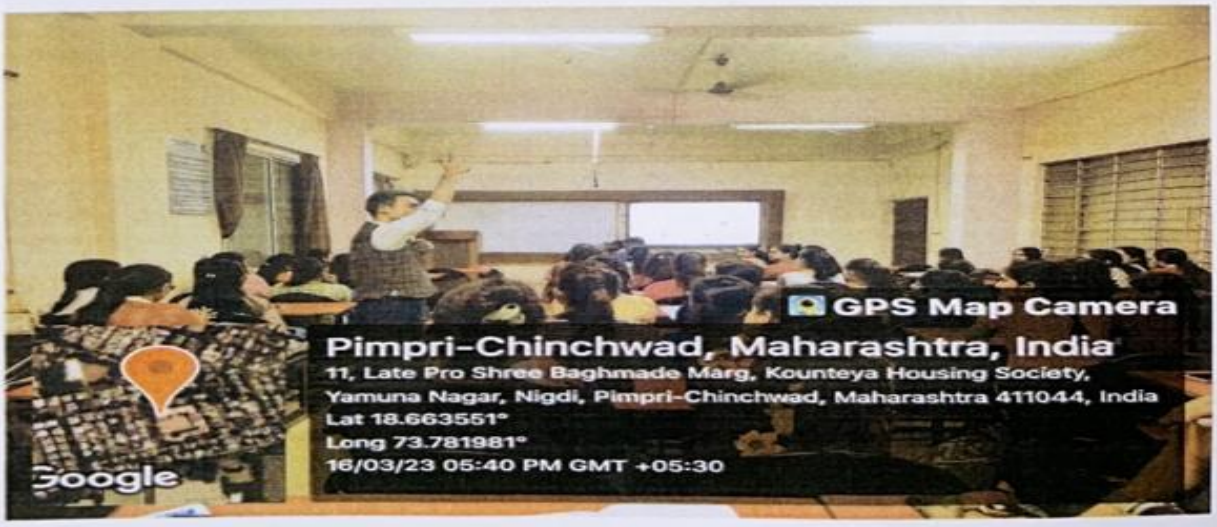


BATCH II

Day 1

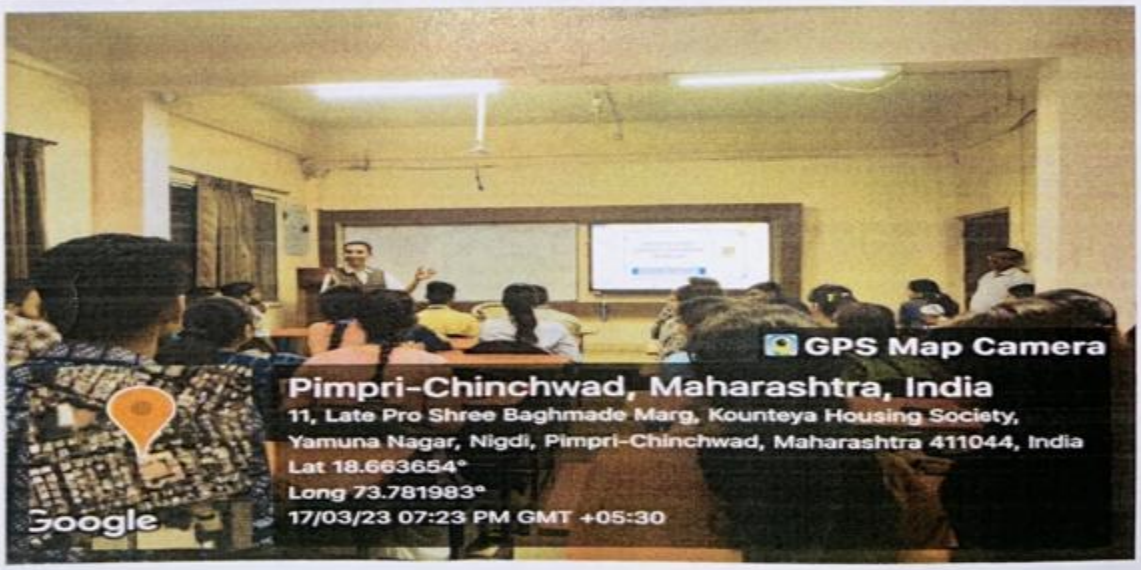
- Module: What is QBD,Principles of ICH Q8 CR2), (ICH Q9), (ICH Q10) ,Definition of QTPP, CQAs, CPPs, CMAs. ,Importance & History of Quality by Design (QbD),Lean Six Sigma. DMADV (Define, Measure, Analyze, Design, Verify) vs. DMAIC (Design, Measure, Analyze, Implement & Control);





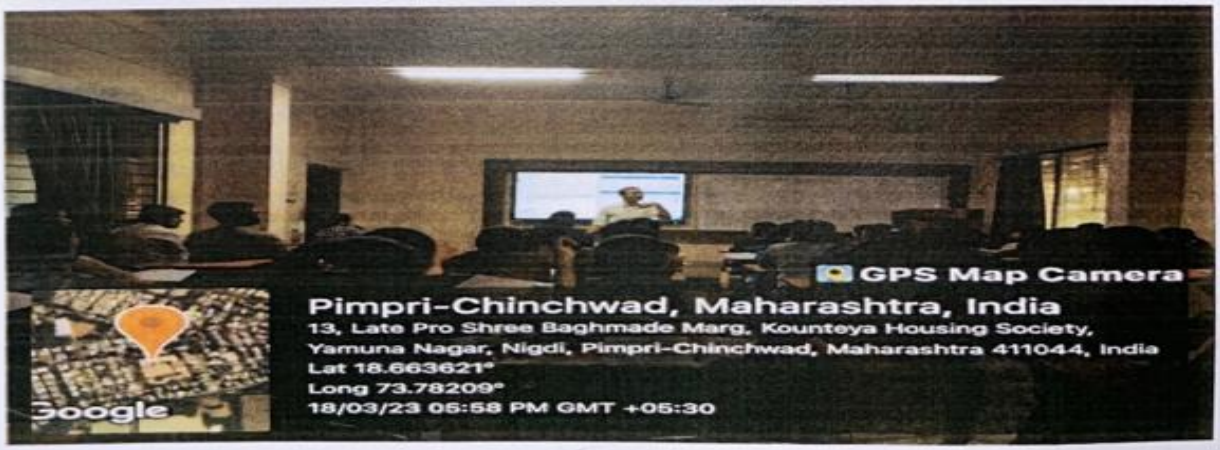
Day 2

Module Determining Critical Quality Attributes (CQAs) based on Product Quality, Patient Safety & Efficacy.. VOC Drill down, Critical-to- quality or Critical-to- safety, Critical-to-efficacy, Critical-to- delivery, Critical-to- cost), VOP, SIPOC, High Level Process Mapping & Fishbone Diagram.Risk Analysis With Failure Modes Effects Analysis (FMEA) & Pareto Analysis, Process Lever Diagnostics Design.Project Charter, Problem Statement & Goal Statement, Project Scoping, Est. Project Benefit / Project QNS, Developing Performance Standard Documents



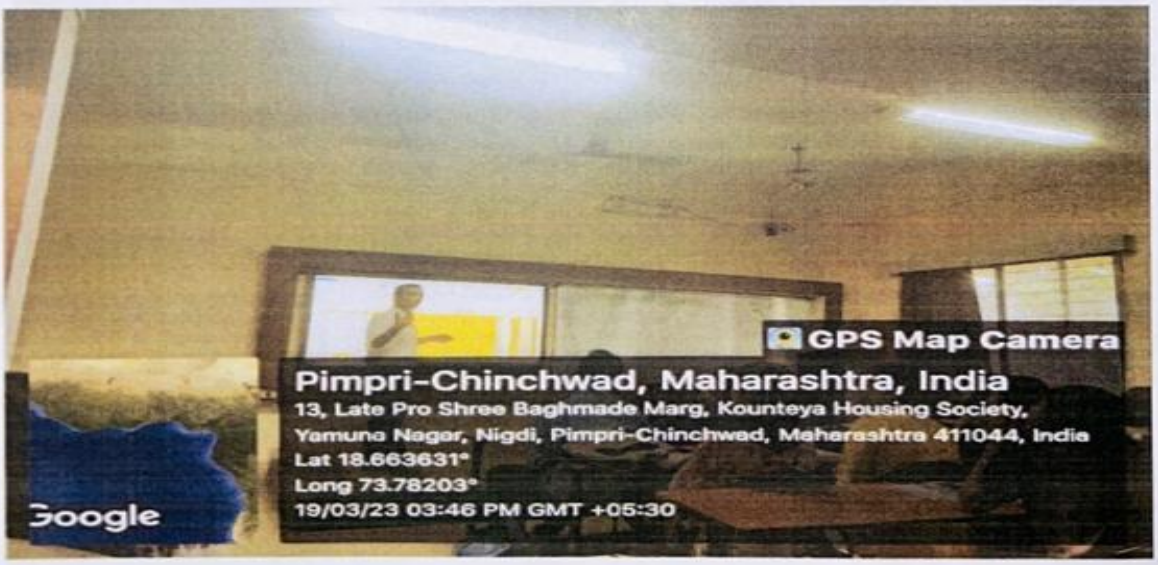
Day 3

- Module Project Communication: RACI Model (Responsible, Accountable, Consulted & Informed) FMEA, CI Matrix Driven Prioritization Of Critical Material Attributes (CMAs) & Critical Process Parameters (CPPs) With respect to CQAs.Principles, History & Types of DOE Designs, Full Factorial Design, Randomization, Replication, Repetition. Develop DoE Design Space, Deployment & Measurement of Responses(s) Development of regression model to Verify Design Space. Hypothesis testing, p value, Alpha value, Regression Coefficient, R Square Analysis, DOE Descriptive analysis: Pareto Plot, Main Effect Plot



Day 4

- Module Interaction Effect Plot & Cube Plots. Statistical Inferential Analysis: Analysis of Model Variance. CMAs /CPPs Optimization With Respect To CQAs. Process Improvement Statistical Validation With 2 Proportion Test.



Day 5,6,7

Determination Of Process Capability: Measurement Of Process Performance Indices- DPMO, DPU, DPO, SIGMA (LT & ST)., Prediction Of Process Capability. Process Design Scale Up & Development Of Control Plan:- Monitoring Plan & Response Plan For CMAs, CPPs, & CQAs. Statistical Process Control: - Control Charts, Combined Control Charts, Selection & Application Of Attribute Control Charts: Control Charts (p chart, nP chart) . Certificate course on "Hands on Training of Sophisticated Instrument"

REPORT OF TRAINING

1.	**Name of activity:**	**Certificate course on "Hands on Training of Sophisticated Instrument**
2.	**Topic of training**	Hands on Training of Horiba Particle size analyzer and zeta sizer.
3.	**Date of activity**	13/02/2023
4.	**Total no Students participated**	62
5.	**Place of training**	Instrumental Lab, 3rd floor, MCOP, Nigdi, Pune.
6.	**Scope & Objectives of training**	• To understand the theory and operation of light scattering particle sizers. • To get hands-on experience using state of the art instrumentation. • To understand the significance of particle size and zeta potential in Novel Drug Delivery System.
7.	**Outcome of training**	• Measuring particle size distributions using Horiba Particle size analyzer instruments. • Data analysis and interpretation of results. • Operation and usage of SZ 100 Horiba software for result interpretation
8.	**Training given by**	Dr. U. S. Desai
9.	**Activity co-coordinator**	Dr. Vitthal V Chopade / Dr A S Tapkir

Current regulatory requirements for conducting clinical trials in India for investigational new drugs/new drug (Version 3.0)

By Dr D. K. Sable, Dr Rubina Bose, Professor V. K. Gupta, Dr Nandini K. Kumar, Shri Arun Kumar B. Ramteke, Dr Sucheta Banerjee Kurundkar, Dr M. Vishnu V. Rao, Dr Atul Juneja, Dr Tulsi Adhikari, Dr Mohua Maulik | CDSA,THSTI,DBT

Learners enrolled: 2671

The course is developed by Clinical Development Services Agency (CDSA) in partnership with the Central Drugs Standard Control Organisation (CDSCO). The course is developed with NPTEL.

CDSA is an extramural unit of the Translational Health Science & Technology Institute (THSTI). THSTI is an autonomous institution under the Department of Biotechnology (DBT), Ministry of Science & Technology, Government of India. CDSA has a national mandate to enhance the capacity and capability of clinical development in India.

CDSCO is the National Regulatory Authority (NRA) of India. It is under the Directorate General of Health Services, Ministry of Health & Family Welfare, Government of India. CDSCO along with the state regulators are jointly responsible for grant of licenses of certain specialized categories of critical drugs such as blood and blood products, intravenous fluids, vaccines, and sera.

It is a pre-requisite for anyone carrying out a clinical trial or involved in new drug development or research for the purpose of seeking regulatory approval in India to know about the current regulatory requirements. This is even more pertinent given the many changes and amendments in the clinical trial and new drug approval rules and regulations in India in recent years.

Version 1 of this online course was launched in early 2019 with 12 lectures as a four-week course. It was attended by 1047 participants during Jan - Mar 2019. On March 19, 2019, the New Drugs and Clinical Trials (NDCT) Rules, 2019 were released. The current online course (Version 2) incorporates the changes and amendments that are part of these latest rules. A series of brainstorming sessions were conducted by CDSA with CDSCO for incorporating the new updates and the feedback received from version 1 participants. It also includes key issues that surfaced during the discussions at the six face-to-face programs (National workshop on regulatory compliance for accelerating innovations) that were conducted by CDSA (Dec 2018-July 2019) under the aegis of DBT, CDSCO, NITI Aayog, and BIRAC-NBM and inputs from the interactive session on NDCT Rules conducted by CDSA with CDSCO at THSTI (May 2019).

This course (version 2) has 24 lectures spread over a period of 8 weeks. This course also involves 8 weekly assignments and a final exit assessment. Only those wishing to undertake the certification exams (which requires payment of a fee) need to opt for the latter. This online course is free. The exam is optional for a fee.

COURSE OBJECTIVES AND EXPECTED LEARNING OUTCOME

Upon completion of this online course, the participants will understand:

- Current New Drugs and Clinical Trials Rules 2019 for conducting clinical trials of the new drug or investigational new drug (IND) to be manufactured or imported in India
- Essential documents required for the conduct and approval of clinical trials, new drug/IND
- Essence and purpose of important trial-related guidelines, such as Good Clinical Practice (GCP), national ethical guidelines for biomedical & health research for human participants (2017), etc

TARGET AUDIENCE : The course is suitable for individuals, both from industry (pharma, biotech, contract research organization) and academia who are involved or interested in Clinical trial and new drug development (R & D/manufacture/ import) in India. This includes investigators, regulatory affairs personnel, human ethics committee members, clinical trial team members/researchers.

PRE-REQUISITES :

There is no pre-requisite to undertake this course. It is suitable for personnel with scientific/medical background (BSc/MSc/PhD/B Pharm/M Pharm/BAMS/BHMS/BDS/MDS/MBBS/MD/DM). Personnel working in the area of drug development/clinical trials/research may benefit from this course.

PES Modern College of Pharmacy, Nigdi, Pune-411 044

ORGANIZATIONS THAT WILL VALUE THE COURSE:

Pharmaceutical companies, Research/Academic Institutions, Biomedical research organizations, Regulatory authorities, Medical colleges, Contract research organizations

This is a RE-RUN Course, hence all the material provided is as per the earlier course, the reading material is the same for version 2.0 and version 3.0. The assignments, exit assessment, etc. are new. In Version 3.0, we are also trying to have a LIVE session (pre-scheduled) and have add-on lectures. All these will be informed. We would like to hear from you more so that we can continually improve.

National Programme on Technology Enhanced Learning (NPTEL)

The National Programme on Technology Enhanced Learning (NPTEL) was initiated by seven Indian Institutes of Technology (Bombay, Delhi, Kanpur, Kharagpur, Madras, Guwahati and Roorkee) along with the Indian Institute of Science, Bangalore in 2003.

The Online Education which was started with NPTEL for Technology Courses has now been broadened to include all other disciplines such as Humanities, Social Sciences and Management in the indigenous online platform SWAYAM.

NPTEL has becomes a part of SWAYAM, all the NPTEL Local Chapters have been re-designated as **SWAYAM - NPTEL Local Chapter.**

Anytime Anywhere Learning

Massive Open Online Courses (MOOC) is essentially an asynchronous platform and a process for teaching through pre-recorded lectures, resource video materials, lecture notes, assignments and quizzes, which are usually online and provide self-assessment in regular intervals during learning.

The enrolment to and learning from these courses involves no cost.
Following these online courses, an in-person, proctored certification exam is conducted across 100+ cities within India and a certificate is provided through the participating institutions and industry, when applicable.

As it is MOOC type of course conducted by Government body open to all and attended by enrolled candidate from any where and anytime.

The National Programme on Technology Enhanced Learning (NPTEL) was initiated by seven Indian Institutes of Technology (Bombay, Delhi, Kanpur, Kharagpur, Madras, Guwahati and Roorkee) along with the Indian Institute of Science, Bangalore in 2003.

The Online Education which was started with NPTEL for Technology Courses has now been broadened to include all other disciplines such as Humanities, Social Sciences and Management in the indigenous online platform SWAYAM.

NPTEL has becomes a part of SWAYAM, all the NPTEL Local Chapters have been re-designated as **SWAYAM - NPTEL Local Chapter.**

Anytime Anywhere Learning

Massive Open Online Courses (MOOC) is essentially an asynchronous platform and a process for teaching through pre-recorded lectures, resource video materials, lecture notes, assignments and quizzes, which are usually online and provide self-assessment in regular intervals during learning.

The enrolment to and learning from these courses involves no cost.
Following these online courses, an in-person, proctored certification exam is conducted across 100+ cities within India and a certificate is provided through the participating institutions and industry, when applicable.

As it is MOOC type of course conducted by Government body open to all and attended by enrolled candidate from any where and anytime.

Name of Course: Course on Pharmacovigilance **Date: 26/08/19 –31/08/19**
Course Code: NA **Course Duration: 34 hrs**

Syllabus

Module I
Introduction to Pharmacology, Clinical Trials, and Pharmacovigilance
Adverse Drug Reactions and Safety Reports
Methodologies in Pharmacovigilance

Module II
Management Systems and Drug Dictionaries in Pharmacovigilance (Argus, ArisG, MedWatch, MedRA, WHODD etc.)
Seriousness & Expectedness & Causality Assessment Criteria
Aggregate Safety Reports

Module III
Pharmacovigilance Regulations in various countries
Pharmacovigilance Programme in India (PVPI)
SignalDetectionandDataMining

Module IV
Pharmacovigilance of HerbalDrugs& MedicalDevices
Pharmacovigilance Compliance and Inspections
Hands-ontrainingonArgus,ArisGlobal,ABcube etc software platforms.

Module V

2019-20

Name of Course: Course on Pharmacovigilance
Course Code: NA

Date: 26/08/19 –31/08/19
Course Duration: 34 hrs

Outcome

1. Students will learn about adverse drug reactions, safety reports, and the methodologies used in pharmacovigilance to detect and assess drug-related risks.
2. Students will dive deeper into the management systems and drug dictionaries used in pharmacovigilance, such as Argus, ArisG, MedWatch, MedRA, and WHODD.
3. Students will also learn about seriousness, expectedness, and causality assessment criteria and how to prepare aggregate safety reports.
4. This Course will cover pharmacovigilance regulations in various countries, giving an understanding of the international context of drug safety monitoring.
5. Students will also learn about compliance and inspections in pharmacovigilance and gain hands-on training on software platforms such as Argus, ArisGlobal, ABCube, etc.
6. This Course will likely involve case studies where students will apply the knowledge and skills gained throughout the course to real-world scenarios, providing a practical perspective on pharmacovigilance.

Summary Report

Type of Program	**Certificate course inPharmacovigilance**
Period	26th August 2019 – 23rd September 2019 (34 hrs)
Brief Report	A certificate course in Pharmacovigilance was conducted at the institute in Collaboration with Elite institute of Pharma skills, Pune. The course was held between 26th August 2019 – 23rd September 2019 (34 hrs). The course covered varied topics like in Module I Introduction to Pharmacology, Clinical Trials, and Pharmacovigilance. Module II explores the various management systems used in pharmacovigilance, such as Argus, ArisG, MedWatch, MedRA, and WHODD, Causality Assessment Criteria.Module III students gain insights into pharmacovigilance regulations implemented in different countries. Module IV Pharmacovigilance of Herbal Drugs& Medical Devices, Hands-on training is provided on software platforms.Module V enables participants to apply their understanding of pharmacovigilance principles, regulations, and methodologies in a practical setting. 84 students at the institute enrolled for this course. The chief course conductors were Elite institute of Pharma skills. Overall, the course on pharmacovigilance covers a wide range of topics, including the fundamentals of pharmacology, adverse drug reactions, safety reporting, pharmacovigilance regulations, signal detection, and data mining. It also provides hands-on training on popular software platforms used in pharmacovigilance. By the end of the course, participants are equipped with the necessary knowledge and skills to effectively contribute to drug safety and pharmacovigilance efforts. The course was Coordinated by Mrs.R.A.Jinturkar Assistant Professor Department of Pharmaceutical Chemistry and well supported by the administrative and non – teaching staff.

Name of Course: Molecular DockingDate: 13/11/19 - 19/11/19
Course Code: NA Course Duration: 34 hrs

Syllabus

Module I
Introduction to Molecular Docking and its applications in various fields.
Protein preparation: Identification of perfect protein for docking study, Validation, Identification of specific grid parameters, Minimization, preparation for docking.

Module II
Protein preparation: Identification of perfect protein for docking study, Validation, Identification of specific grid parameters, Minimization, preparation for docking.

Module III
Ligand Preparation: Tools, Various formats, Minimization, Optimization Running Docking.

Module IV
Analysis of Results to get publication quality images.
Discussion on manuscript writing

Name of Course: Molecular Docking **Date: 13/11/19 - 19/11/19**
Course Code: NA **Course Duration: 34 hrs**

Outcome

1. Students should gain a solid understanding of the principles and applications of molecular docking, which is a computational technique used to predict how molecules, such as small ligands, interact with a target protein.
2. Students will learn how to prepare proteins and ligands for docking simulations. This includes identifying suitable proteins, validating their structures, selecting appropriate grid parameters for docking simulations, and preparing ligands for docking studies.
3. Students will learn various docking algorithms and techniques for predicting the binding poses of ligands to proteins. They will also learn about tools and software used in molecular docking simulations.
4. Students will gain hands-on experience in running docking simulations, optimizing the parameters, and analyzing the results.
5. Learners will learn how to analyze the docking results and interpret the binding poses of ligands with proteins. This step is crucial for understanding the interactions and predicting the potential biological activity of the ligands.
6. Students will be trained to create publication-quality images and visualizations to present their docking results effectively.
7. The course may involve guidance on writing a scientific manuscript, discussing the results, and presenting them in a format suitable for publication in scientific journals.

Summary Report

Type of Program	**CertificateCourse on Molecular Docking**
Period	13th November 2019 – 19th November 2019 (34 hrs)
Brief Report	A certificate course in Molecular Docking was conducted at the institute in Collaboration with Elite institute of Pharma skills, Pune .The course was held between 13th November 2019 – 19th November 2019 (34 hrs).The course covered varied topics like in Module I students were introduced to the fundamental concepts , applications and The importance of Molecular Docking in drug discovery, protein-ligand interactions, and virtual screening Module II Students delved deeper into the selection and validation of proteins suitable for docking studies. They learned about different protein databases and tools available to aid in the identification of appropriate proteins. Module III Ligand Preparation: Tools, Various formats, Minimization, Optimization Running Docking.Module IV focused on the analysis and interpretation of docking results. 42 students of the institute enrolled for this course. Overall, the course on Molecular Docking provided students with a comprehensive understanding of the principles, techniques, and applications of Molecular Docking. By the end of the course, students gained practical skills in protein and ligand preparation, running docking simulations, analyzing results, and manuscript writing, making them well-equipped to undertake molecular docking studies in their respective fields of research. The course was Coordinated by Mr. Somdatta Chaudhari Assistant Professor Department of Pharmaceutical Chemistry and well supported by the administrative and non –teaching staff.

National Programme on Technology Enhanced Learning (NPTEL)

The National Programme on Technology Enhanced Learning (NPTEL) was initiated by seven Indian Institutes of Technology (Bombay, Delhi, Kanpur, Kharagpur, Madras, Guwahati and Roorkee) along with the Indian Institute of Science, Bangalore in 2003.

The Online Education which was started with NPTEL for Technology Courses has now been broadened to include all other disciplines such as Humanities, Social Sciences and Management in the indigenous online platform SWAYAM.

NPTEL has becomes a part of SWAYAM, all the NPTEL Local Chapters have been re-designated as **SWAYAM - NPTEL Local Chapter.**

Anytime Anywhere Learning

Massive Open Online Courses (MOOC) is essentially an asynchronous platform and a process for teaching through pre-recorded lectures, resource video materials, lecture notes, assignments and quizzes, which are usually online and provide self-assessment in regular intervals during learning.

The enrolment to and learning from these courses involves no cost.
Following these online courses, an in-person, proctored certification exam is conducted across 100+ cities within India and a certificate is provided through the participating institutions and industry, when applicable.

As it is MOOC type of course conducted by Government body open to all and attended by enrolled candidate from any where and anytime.

Name of Course: Medical Device in Regulatory Affairs **Date: 24/09/18-29/09/18**
Course Code: NA **Course Duration: 32 hrs**

Syllabus

Module I

Regulatory Strategy: This module involves the development of a strategic plan to navigate the regulatory requirements for medical devices. It includes assessing applicable regulations, determining the appropriate regulatory pathway, and defining the overall regulatory approach for the device.

Module II

Pre-Market Submission: This module focuses on preparing and submitting the necessary documentation to gain market authorization or clearance for a medical device. It typically involves creating technical files, design dossiers, or pre-market approval (PMA) applications depending on the regulatory framework in the target market.

Clinical Evaluation: For medical devices that require clinical data to demonstrate safety and efficacy, the clinical evaluation module involves planning, conducting, and analyzing clinical studies or gathering relevant clinical evidence to support the device's regulatory compliance.

Module III

Quality Management System (QMS): QMS is an essential module that encompasses the processes and procedures for ensuring the quality, safety, and effectiveness of medical devices. It involves developing and implementing a robust quality management system in compliance with applicable standards (e.g., ISO 13485) and regulations.

Post-Market Surveillance: This module focuses on monitoring the performance, safety, and effectiveness of medical devices once they are on the market. It involves activities such as adverse event reporting, complaint handling, post-market clinical follow-up studies, and periodic safety updates.

Module IV

Labelling and Packaging: Regulatory requirements often dictate specific labelling and packaging considerations for medical devices. This module involves developing compliant labelling, instructions for use, and ensuring that the packaging materials and methods meet the relevant regulatory standards.

Regulatory Compliance and Auditing: This module involves monitoring and ensuring ongoing compliance with regulatory requirements, standards, and guidelines. It may include internal audits, regulatory inspections, and compliance assessments to maintain market authorization or clearance for the device.

MANAGEMENT

SIX SIGMA

PROF. JITESH J THAKKAR
Department of Industrial and Systems Engineering
IIT Kharagpur

TYPE OF COURSE : New | Elective | UG/PG
COURSE DURATION : 12 weeks (28 Jan'19 - 19 Apr'19)
INTENDED AUDIENCE : Mechanical, MBA, Industrial
EXAM DATE : 28 April 2019
PRE-REQUISITES : Engineering and Math courses in undergraduate (B Tech) program.

INDUSTRIES APPLICABLE TO : Manufacturing and Service Industry

COURSE OUTLINE :

The course on Six Sigma will focus on detailed strategic and operational issues of process improvement and variation reduction called Six Sigma, a measure of quality that strives for near perfection. It is a disciplined, data-driven approach for eliminating defects (driving towards six standard deviations between the mean and the nearest specification limit) in any process-from manufacturing to transactional and from product to service. A Six Sigma defect is anything outside of customer specifications. To be tagged Six Sigma, a process must not produce more than 3.4 defects per million opportunities.

ABOUT INSTRUCTOR :

Dr. Jitesh J. Thakkar is an Associate Professor at the Department of Industrial and Systems Engineering, Indian Institute of Technology Kharagpur, India. He received Ph.D in Supply Chain Management from IIT Delhi, Masters in Technology in Industrial Engineering from IIT Delhi and Bachelors in Mechanical Engineering with Gold Medal from the oldest Government Engineering College Birla Vishvakarma Mahavidyalaya, Sardar Patel University, Gujarat.

COURSE PLAN :

Week 01 : Brief overview of the course, Quality concepts and definition, Six Sigma overview and history of continuous improvement, Six Sigma principles and focus areas, Six Sigma Applications

Week 02 : Quality management: Basics and Key concepts, Fundamentals of Total Quality Management (TQM), Cost of quality and Six Sigma, Voice of customer, Quality Function Deployment (QFD) Six Sigma Management tools

Week 03 : Six Sigma : Project identification, selection and definition, Six Sigma : Project Charter and Monitoring, Process characteristics and analysis, Process Mapping, Data collection

Week 04 : Measurement systems: Fundamentals, Measurement system analysis : Gauge R & R Study, Seven QC Tools, Basic statistics, Probability theory

Week 05 : Hypothesis testing: Fundamentals, Hypothesis testing: Two population Test, Hypothesis testing: Two population: Examples and Illustrations, Correlation and Regression analysis: Key principles, Correlation and Regression analysis: Model validation

Week 06 : Statistical Process Control: Basics, Statistical Process Control: Control Charts for variables, Statistical Process Control: Control Charts for attributes, Statistical Process Control: Implementation issues, Statistical Process Control: Minitab application

Week 07 : Process capability analysis: Basics and concepts, Process capability analysis: Measures and indices, Process capability analysis: Minitab application, Non-normal process capability analysis, Non-normal process capability analysis: Minitab application

Week 08 : Failure Mode Effect Analysis (FMEA): Basics and Principles, Failure Mode Effect Analysis (FMEA): Application, Multi-vari analysis: Basics and concepts, Multi-vari analysis: Illustrative example, Multi-vari analysis: Application in Minitab

Week 09 : ANOVA: Basics, One-way ANOVA, Two-way ANOVA, Introduction to Design of Experiment, Design of Experiment: Replication, Repetition and Blocking

Week 10 : Randomized block design: Basics, Randomized block design: Illustrative application, Randomized block design: Application in Minitab,Factorial design: Basics, Factorial design: Illustrative application

Week 11 : Fractional factorial design: Basics and concepts, Fractional factorial design: Key principles, Fractional factorial design: Illustrative example, Taguchi Method: Basics and concepts, Taguchi Method: Practical application

Week 12 : Design for Six Sigma (DFSS): Key concepts, Design for Six Sigma (DFSS): DFM, DFA, DMADOV, Team Management, Six Sigma: Case study, Six Sigma: Summary of key concepts and strategies

Course abstract

The course on Six Sigma will focus on detailed strategic and operational issues of process improvement and variation reduction called Six Sigma, a measure of quality that strives for near perfection. It is a disciplined, data-driven approach for eliminating defects (driving towards six standard deviations between the mean and the nearest specification limit) in any process-from manufacturing to transactional and from product to service. A Six Sigma defect is anything outside of customer specifications. To be tagged Six Sigma, a process must not produce more than 3.4 defects per million opportunities. The course will provide an exposure to well-established methods of quality assurance and management and advanced statistical methods including design of experiments. Six Sigma is recognized as modern quality strategy to compete and sustain in the global markets. The philosophy of Six Sigma is built on two frameworks-DMAIC (define, measure, analyze, improve, control) and DMADV (define, measure, analyze, design, verify). This course will provide a detailed understanding on both the methodologies to the students. The course intends to cover basic concepts in quality management, TQM, Cost of quality, quality engineering and Six Sigma, review of Probability and Statistics, Test of Hypothesis. Subsequently, the course will focus on DMAIC process for process and design improvement, Acceptance Sampling, SPC (Statistical Process Control), Process Capability, Gage Reproducibility and Repeatability, Quality Function Deployment. This will be followed by advanced quality control tools like Design of Experiments, ANOVA,

PES Modern College of Pharmacy, Nigdi, Pune-411 044

EVOP, Fractional, Full and Orthogonal Experiments, Regression model building, Taguchi methods for robust design, and Six Sigma sustainability. The course is designed with a practical orientation and includes cases and industry applications of the concepts

()

Dr. Jitesh J. Thakkar is an Associate Professor at the Department of Industrial and Systems Engineering, Indian Institute of Technology Kharagpur, India. He received Ph.D in Supply Chain Management from IIT Delhi, Masters in Technology in Industrial Engineering from IIT Delhi and Bachelors in Mechanical Engineering with Gold Medal from the oldest Government Engineering College Birla Vishvakarma Mahavidyalaya, Sardar Patel University, Gujarat. He has 18 years of teaching, research and industry experience. He has been invited as a faculty expert by various reputed institutes such as IIT Kanpur, IIT Madras, IIM Indore, NITIE Mumbai, NIT Surat, NIT Trichy, Institute of Rural Management Anand (IRMA), Ahmedabad Management Association (AMA), BCCI Kolkata, Adani Institute of Infrastructure Management (AIIM), L&T Project Management Institute, Chennai. He has guided four PhD at IIT Kharagpur in the areas of Sustainable Supply Chain Management and Lean Manufacturing. He has supervised more than 50 M.Tech and B.Tech projects at IIT Kharagpur. He has published 53 research papers in the leading International Journals in the areas of Lean & Sustainable manufacturing, Supply Chain Management, Quality Management, Small and Medium Enterprises and Performance Measurement. The publications have appeared in the leading journals – International Journal of Production Economics, Journal of Cleaner Production, Production Planning and Control, Computers & Industrial Engineering, Expert System with Applications, International Journal of Advanced Manufacturing Technology, Resources Policy, International Journal of Quality and Reliability Management, Journal of Manufacturing Technology Management and International Journal of Productivity and Performance Measurement. He is an Editorial Board member for three journals: i) International Journal of Productivity and Performance Management; ii) International Journal of Quality and Reliability Management and iii) International Journal of Lean Six Sigma. He has trained Corporate Managers in Lean Manufacturing, Process Excellence, Six Sigma, Value Engineering, Project Management, Quality Management, Supply Chain Management and Statistical Decision Making. He has also trained Teachers in Research & Publication and Teaching & Learning

Attendance

National Programme on Technology Enhanced Learning (NPTEL)

The National Programme on Technology Enhanced Learning (NPTEL) was initiated by seven Indian Institutes of Technology (Bombay, Delhi, Kanpur, Kharagpur, Madras, Guwahati and Roorkee) along with the Indian Institute of Science, Bangalore in 2003.

The Online Education which was started with NPTEL for Technology Courses has now been broadened to include all other disciplines such as Humanities, Social Sciences and Management in the indigenous online platform SWAYAM.

NPTEL has becomes a part of SWAYAM, all the NPTEL Local Chapters have been re-designated as **SWAYAM - NPTEL Local Chapter.**

Anytime Anywhere Learning

Massive Open Online Courses (MOOC) is essentially an asynchronous platform and a process for teaching through pre-recorded lectures, resource video materials, lecture notes, assignments and quizzes, which are usually online and provide self-assessment in regular intervals during learning.

The enrolment to and learning from these courses involves no cost.
Following these online courses, an in-person, proctored certification exam is conducted across 100+ cities within India and a certificate is provided through the participating institutions and industry, when applicable.

As it is MOOC type of course conducted by Government body open to all and attended by enrolled candidate from any where and anytime.

MEDICINAL CHEMISTRY

CHEMISTRY AND BIOCHEMISTRY

PROF. HARINATH CHAKRAPANI
Department of Chemistry
IISER Pune

TYPE OF COURSE : New | Core| UG/PG

COURSE DURATION : 12 weeks (28 Jan'19 - 19 Apr'19)

EXAM DATE : 27 Apr 2019

PRE-REQUISITES : Any student who has done basic organic chemistry and has some knowledge of biochemistry with an interest in drug discovery.

INDUSTRIES APPLICABLE TO : Companies in the pharmaceutical sector may recognize and value this course.

COURSE OUTLINE :

The main objective of this course is to familiarize students with the fundamental concepts of drug discovery and development. The course is intended for students who have a background in chemistry and interested in the process of drug discovery. The intended outcome is to train students on various aspects of new drug discovery/ development, drug screening, target identification, lead discovery, optimization and the molecular basis of drug design and drug action.

ABOUT INSTRUCTOR :

Harinath Chakrapani completed his undergraduate and post-graduate studies in Chemistry from Loyola College and Indian Institute of Technology Madras, respectively. He moved to Duke University, USA to pursue his doctoral studies and after post-doctoral research stints at Wake Forest University and the National Cancer Institute, USA, he joined IISER Pune in July 2009 and is currently Associate Professor. His research interests are in organic chemistry and chemical biology. His laboratory works on developing new tools to study effects of oxidative stress responses in cells and antibiotic resistance. He has over eight years of teaching experience at IISER Pune.

COURSE PLAN :

Week 01 : An overview of drugs and drug targets; structure of a cell; intermolecular binding forces; classification of drugs.

Week 02 : Principles of enzyme structure, catalysis and inhibition in drug discovery: Enzyme mechanisms overview; enzyme catalysis and inhibition in drug discovery; reversible and irreversible inhibitors; transition-state inhibitors; case studies

Week 03 : Principles of enzyme structure, catalysis and inhibition in drug discovery: Enzyme mechanisms overview; enzyme catalysis and inhibition in drug discovery; reversible and irreversible inhibitors; transition-state inhibitors; case studies,Receptors function and ligand binding interactions; Ion channel receptors; kinase-linked receptors; G-Protein coupled receptors, drug-receptor interaction; dose-response curves; case studies

Week 04 : Receptors function and ligand binding interactions; Ion channel receptors; kinase-linked receptors; G-Protein coupled receptors, drug-receptor interaction; dose-response curves; case studies

Week 05 : Nucleic acids structure and function; DNA interactive agents and chemotherapy: DNA binding agents; intercalation and alkylation; DNA strand breakers; case studies

Week 06 : Synthetic methods in medicinal chemistry: Combinatorial and parallel synthesis: solid phase techniques, mix and split method in combinatorial synthesis; dynamic combinatorial synthesis; solid phase synthesis; diversity-oriented synthesis.

Week 07 : Lead discovery; Bioassays; drug targets; Lead Modification; optimization; pharmacophore; homologation; bioisostere; chain branching; Electronic effects; Lipophilicity; Structure-Activity Relationships; Quantiative-structure activity relationships (QSAR).

Week 08 : Lead discovery; Bioassays; drug targets; Lead Modification; optimization; pharmacophore; homologation; bioisostere; chain branching; Electronic effects; Lipophilicity; Structure-Activity Relationships; Quantiative-structure activity relationships (QSAR).

Week 09 : Drug metabolism and pharmacology: Analytical methods in metabolism; Phase I and Phase II transformations; Absorption, distribution, metabolism and excretion (ADME); bioavailability; pre-clinical and clinical development; therapeutic index and therapeutic window.

Week 10 : Prodrugs and drug delivery systems: Use of prodrug systems; prodrugs for stability, solubility and slow release; overview of drug delivery

Week 11 - 12 : Drug resistance mechanisms and synergism: Mechanisms of drug resistance; circumventing drug resistance; drug synergy

National Programme on Technology Enhanced Learning (NPTEL)

The National Programme on Technology Enhanced Learning (NPTEL) was initiated by seven Indian Institutes of Technology (Bombay, Delhi, Kanpur, Kharagpur, Madras, Guwahati and Roorkee) along with the Indian Institute of Science, Bangalore in 2003.

The Online Education which was started with NPTEL for Technology Courses has now been broadened to include all other disciplines such as Humanities, Social Sciences and Management in the indigenous online platform SWAYAM.

NPTEL has becomes a part of SWAYAM, all the NPTEL Local Chapters have been re-designated as **SWAYAM - NPTEL Local Chapter.**

Anytime Anywhere Learning

Massive Open Online Courses (MOOC) is essentially an asynchronous platform and a process for teaching through pre-recorded lectures, resource video materials, lecture notes, assignments and quizzes, which are usually online and provide self-assessment in regular intervals during learning.

The enrolment to and learning from these courses involves no cost.
Following these online courses, an in-person, proctored certification exam is conducted across 100+ cities within India and a certificate is provided through the participating institutions and industry, when applicable.

As it is MOOC type of course conducted by Government body open to all and attended by enrolled candidate from any where and anytime.

STRESS MANAGEMENT

PROF. RAJLAKSHMI GUHA
Centre for Educational Technology
IIT Kharagpur

TYPE OF COURSE : Rerun | Elective | UG/PG
INTENDED AUDIENCE : M.E/M.Tech, M.S, M.Sc, PhD
PRE-REQUISITES : Basic knowledge in communication and a good understanding of English
COURSE DURATION : 4 weeks (13 Aug'18 - 07 Sep'18)
EXAM DATE : 07 Oct 2018

COURSE OUTLINE :

Stress is a part of daily living and each individual responds to stress differently. Thus there's no "one size fits all" solution to managing stress. Stress management techniques can teach an individual healthier ways to cope with stress, help reduce its harmful effects, and prevent stress from spiraling out of control again in the future. The goal of stress management is not to eliminate all stress. This course aims to teach the student how to limit the harmful effects of stress while maintaining life's quality and vitality.

TYPE OF COURSE : Rerun | Elective | UG/PG
INTENDED AUDIENCE : B.E/B.Tech, M.E/M.Tech, M.S, B.Sc/M.Sc, Ph.D
PRE-REQUISITES : Basic knowledge in biology

COURSE DURATION : 4 weeks (27 Aug'18 - 21 Sep'18)
EXAM DATE : 28 Oct 2018

COURSE OUTLINE :

Biomedical nanotechnology is a rapidly developing field, which includes a diverse collection of disciplines. The applications of nanotechnology are gaining overwhelming response in almost all the fields. Especially in healthcare sector, tremendous developments have been achieved. For example, cancer diagnosis and therapy, medical implants, tissue engineering etc. In the coming years, the developments in this field are expected to fluorish and lead to several life saving medical technologies and treatment methods. Thus, the main objective of this course is to impart knowledge on biomedical applications of nanotechnology.

ABOUT INSTRUCTOR :

Prof. P. Gopinath is an Associate Professor in the Department of Biotechnology at Indian Institute of Technology (IIT) Roorkee, India. He received his B.Sc. degree in Microbiology and M.Sc. degree in Biotechnology from Bharathidasan University, India. He earned his Ph.D. in Biotechnology at Indian Institute of Technology Guwahati, India. He did his postdoctoral research at University of Rochester Medical Center, New York, USA. Currently his research group in nanobiotechnology laboratory is working on the development of various polymer based nanocarriers for the delivery of various anticancer agents including anticancer drugs, siRNA, genes etc. This group is also exploring the possibilities of various biocompatible imaging agents for cancer diagnosis. In order to realize the efficacy of such therapeutic and imaging agents, they are validating these systems in an artificial scaffold which mimics the in vivo condition to the closest extent. He has published more than 60 research articles, 5 books and 6 book chapters.

COURSE PLAN :

Week 01 : Introduction to nano, Nano-biomimicry, Synthesis of nanomaterials by physical and chemical methods, Synthesis of nanomaterials by biological methods, Characterisation of nanomaterials

Week 02 : DNA nanotechnology, Protein & glyco nanotechnology, Lipid nanotechnology, Bio-nanomachines, Carbon nanotube and its bio-applications.

Week 03 : Nanomaterials for cancer diagnosis, Nanomaterials for cancer therapy, Nanotechnology in tissue engineering, Nano artificial cells, Nanotechnology in organ printing.

Week 04 : Nanotechnology in point-of-care diagnostics, Nanopharmacology & drug targeting, Cellular uptake mechanisms of nanomaterials, In vitro methods to study antibacterial and anticancer properties of nanomaterials, Nanotoxicology
